Importance of reading to youngsters in the home and use of phonics was stressed by a reading supervisor to parents and teachers present at a meeting of the Parent-Teachers Association at Rochester Memorial School. Mrs. Edmund Arruda presided. Paul Alves, a fourth grade teacher, gave the PTA prayer. Secretary's report was read by Mrs. Harry Brown and the treasurer's report by Mrs. John Hayes.

March 30 at the school in honor of Mrs. Madeline Baker, who is retiring after serving as school nurse for 20 years in the Rochester School system.

Various types and methods of reading, including skimming, rapid depth and study reading and the importance of each type to students of grade and high school levels were explained by Mrs. Bartlett Cushing, reading supervisor of Rochester, Marion and Mattapoisett. The guest speaker also emphasized the importance of parents reading to the children in the home. "So much so in fact that a teacher can tell in a very short time whether a child has been read to." Mrs. Cushing stressed that phonics "is of great importance." She noted that when difficulty is discovered in a child's study habits it can be traced to a lack of phonics ability.

MODELS 776N AND 776

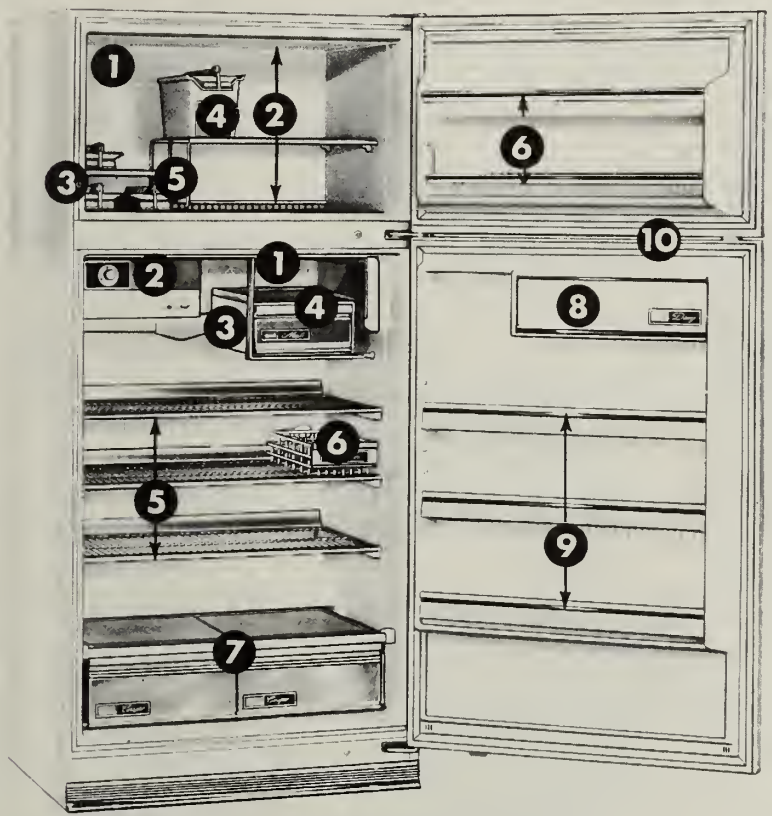
KELVINATOR

"NO-FROST" TRIMWALL

FREEZER SECTION FEATURES

1 **"NO-FROST" FREEZER**—Kelvinator's superior "No-Frost" system utilizes warm refrigeration gases to banish frost from freezer shelves, packages, and walls. Because it uses no electrical heating elements or extra tubes in the defrosting system, it is more reliable and much more economical.

2 **BIG CAPACITY**—This big freezer has the convenience features you need to store frozen foods. It has a capacity of 157 pounds in Model 776N and 150 pounds in Model 776NA, which is equipped with an automatic ice-maker and dispenser. This feature lets you make and store ice cubes until ready for use. You have no ice trays to fill . . . never have to worry about running out of ice.



QUALITY CONSTRUCTION FEATURES

TRIMWALL CONSTRUCTION—Kelvinator's exclusive Trimwall is a solid three-ply wall with tremendous structural strength. Outer wall is of steel, while the inner wall of the refrigerator compartment is a tough, chip-proof, corrosion-proof ABS material. Both walls are bonded together with a core of foamed insulation to provide a solid, seamless fresh-food compartment with strength and cold-keeping efficiency not possible with any other method of cabinet construction. The freezer compartment uses Trimwall Construction with both inner and outer walls of steel. Inner steel wall insures superior efficiency in maintaining zero-cold.

POLARSPHERE COLD-MAKING UNIT—Kelvinator's Polarsphere is known the world over as the finest of cold-makers. It is economical, dependable, trouble-free and exceptionally quiet in operation.

5-YEAR WARRANTY—Kelvinator warrants the entire Trimwall refrigerator for one year and the Polarsphere unit for an additional four years.

3 **THREE ICE TRAYS**—(In Model 776N) Smooth-acting ejector ice trays and storage shelf make it easy to freeze and release ice cubes. Model 776NA does not need trays since it has the automatic ice-maker.

4 **ICE CUBE STORAGE CHEST**—This chest stores ice cubes until ready for use.

5 **REMOVABLE STORAGE SHELF**—This convenient shelf is removable to allow you complete flexibility in storage.

6 **DOOR SHELVES**—Two, deep storage door shelves let you store frozen-food packages in "bookcase" fashion. There also is plenty of room for juice cans, other items. Lower shelf has lift-up guard rail for easy removal of packages.

REFRIGERATOR STORAGE FEATURES

1 **AUTOMATIC DEFROSTING**—The Kelvinator Humidiplate provides defrosting in the refrigerator section. This efficient system gives you a "just right" balance between cold and moisture, keeps your refrigerator free of frost at all times.

2 **ILLUMINATED CONTROL PANEL**—Control knob lets you make a single setting to maintain just the right balance of temperature in refrigerator and freezer. Two incandescent lights behind panel illuminate the interior of your refrigerator. A third light is located on the back wall.

3 **MEAT-KEEPER**—Porcelain-finished meat-keeper located near cold Humidiplate keeps meat at near-freezing temperatures.

4 **HALF-SHELF**—Meat-keeper cover forms a half-shelf which is ideal for storage of small items.

5 **THREE SLIDING SHELVES**—Three center pull-out shelves are placed at just the right level for greatest convenience and flexibility in loading and unloading. Chrome-finished back on the shelves prevents items from falling off.

6 **PORTABLE EGG BASKET**—Holds two-dozen eggs; moves easily to range or sink. Stores anywhere in the refrigerator.

7 **TWIN PORCELAIN CRISPERS**—Twin crispers are porcelain-finished. Each has a big capacity—13.2 dry quarts. Clear-view covers over crispers seal in moisture. Covers may be removed separately from each crisper for easy cleaning.

8 **DAIRY CHEST**—This in-the-door chest, with automatic-closing door, stores butter and cheese, includes a butter serving dish.

9 **HIGH-CAPACITY DOOR SHELVES**—Three sturdy, deep door shelves let you store milk cartons and tall bottles. Two upper shelves are adjustable, all are removable for cleaning.

10 **MAGNETIC DOOR GASKETS**—Powerful, permanent magnets in Koroseal gaskets keep doors tightly closed, seal cold in, heat out. Doors open with a gentle pull for maximum convenience—open easily from inside for maximum safety.

"We are very sorry to be obliged to first call attention to the recent statements made public concerning our schools for the reason that it has brought unmerited criticism upon them.

No court of justice will entertain for a moment any hearsay evidence in a case on trial; but in the case of our schools, people undertake to judge, with a few exceptions of that of which they really know nothing except through a roundabout channel, as they scarce ever visit our schools and those who do so visit them are very apt to be biased in favor of or against, before they enter."
